

*IMMANUEL
KANT*

Theology.
Describing the architecture of political structures.

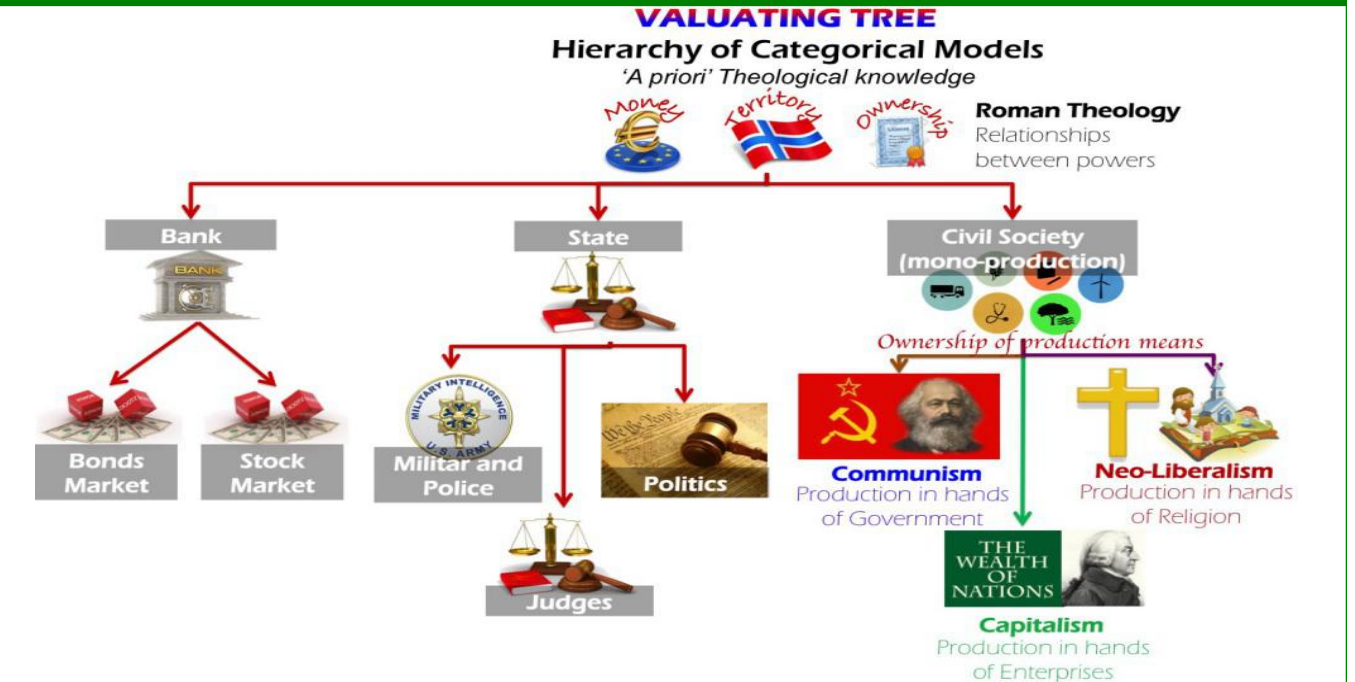

SUMMARY

Theology is the science that studies resources administration that turn out into a structure of social powers.

The management of resources obey to causal laws, therefore it is defined by a unique set of behavior equations or archetypes, which will be implemented by different social structures or institutions.

The archetypes has an historical genesis and evolution independent from the social institution that implement them, in other words, they are '*modus operandi*' without concrete parameters specifications, just as happens with mathematical equations. Below, an example.

THEOLOGICAL ARCHITECTURE... EXAMPLE: SYMBOL OF THE ROMAN CULTURE.

Power	Theological Categories	
Money		Supra-government structures: <ul style="list-style-type: none"> <u>Weapons</u>: Bonds Market, Central Banking. <u>Stocks</u>: Stocks Market, Investment Banking. <u>Savings</u>: Financial Market, Commercial Banking.
Territory		Government, military assurance to the license of property. <ul style="list-style-type: none"> <u>Militar and Police</u>: Intelligence and Troops. <u>Judicature</u>: jurisdictions system. <u>Politics</u>: parties.
Property		Packing resources: <ul style="list-style-type: none"> <u>Company</u>: social working forces. <u>Land</u>: space with its contents.

Relationship between Powers

- ✓ **Money rules due to the existence of a mono-production based economy**: you can't survive among one product, therefore, you need to sell, that leave the entire productive system in hands of money makers... British trading network and the associated banking information agents.
- ✓ **Mono-production exists due to the military forces that ensure the property license principle**: governments are created to ensure the structure of the economic system as mono-productions.

KANT: LOGICAL META-STRUCTURES

(<https://kant.site>)

PURE REASON *To KNOW, WHAT IS IT?*

Understand the environment,
which is located in space-time

PRACTICAL REASON *To VALUE, FOR WHAT DOES IT EXISTS?*

Contextualized knowledge within
an internal system of references or
information

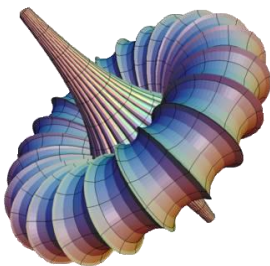

Correct Knowledge...
exact analysis or
a phenomenon.

- **Mathematical Model** able to reproduce a phenomenon.
- **Cause-Effect Law:** understand causal law of phenomena.

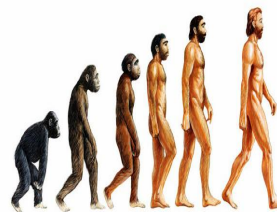

Correct Valuation...
calibration or exact synthesis of a circumstance.

- **Archetype model** able to reproduce a behavior.
- **Jesus Christ Law:** enhance their own and genuine reason to be of the resources.

Mathematical Model

Scientific Method: observation of the phenomena until you are able to reproduce and predict them.

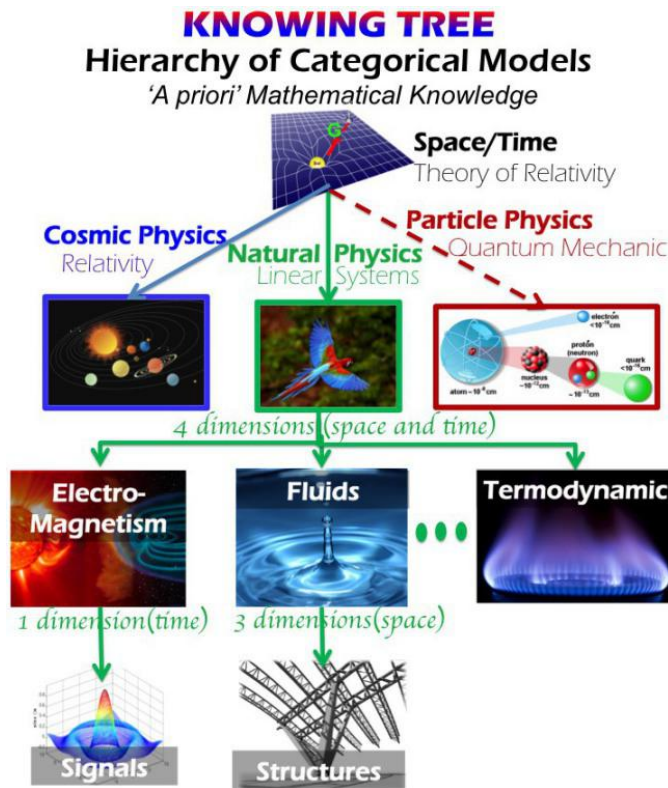

Archetype

Archetypal Method: observation of genesis and evolution of behaviors until you are able to reproduce and predict them.

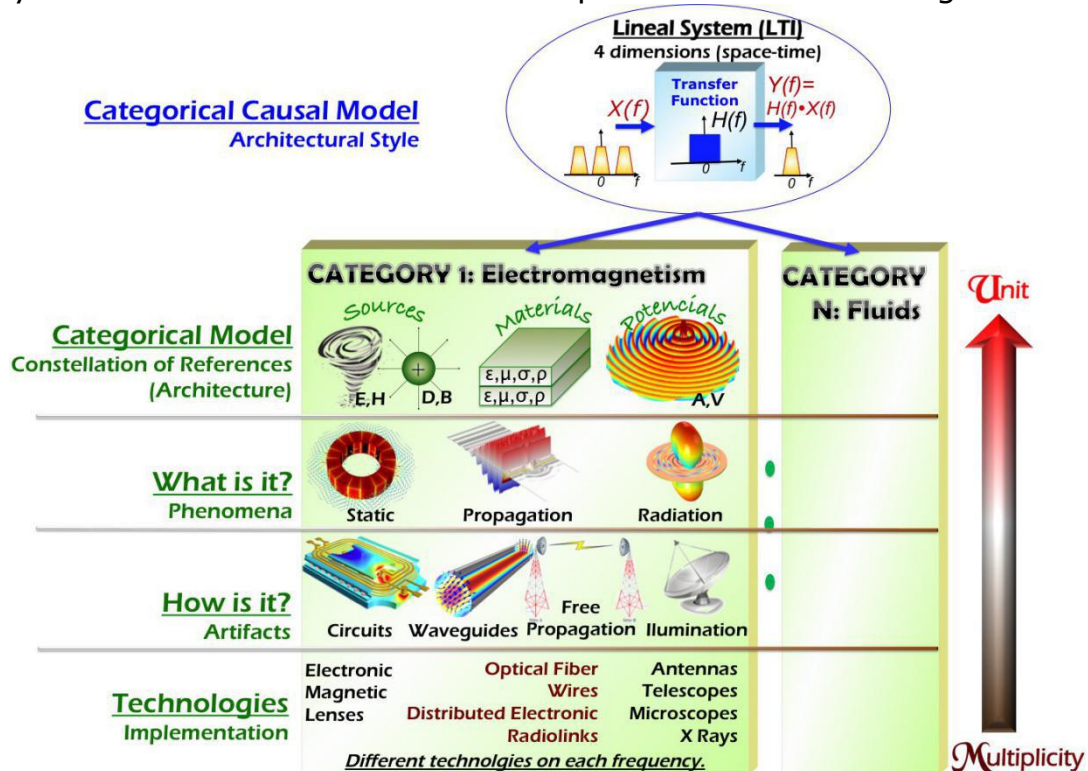

KNOWING TREE (PHYSICAL SCIENCES)

Knowing Tree: Hierarchical network of knowing categories, which describe space-time.

KNOWING CATEGORY: set of referential concepts and the associated mathematical models which describe all his phenomenology, structured in three layers: What is it? How is it? and implementation technologies.

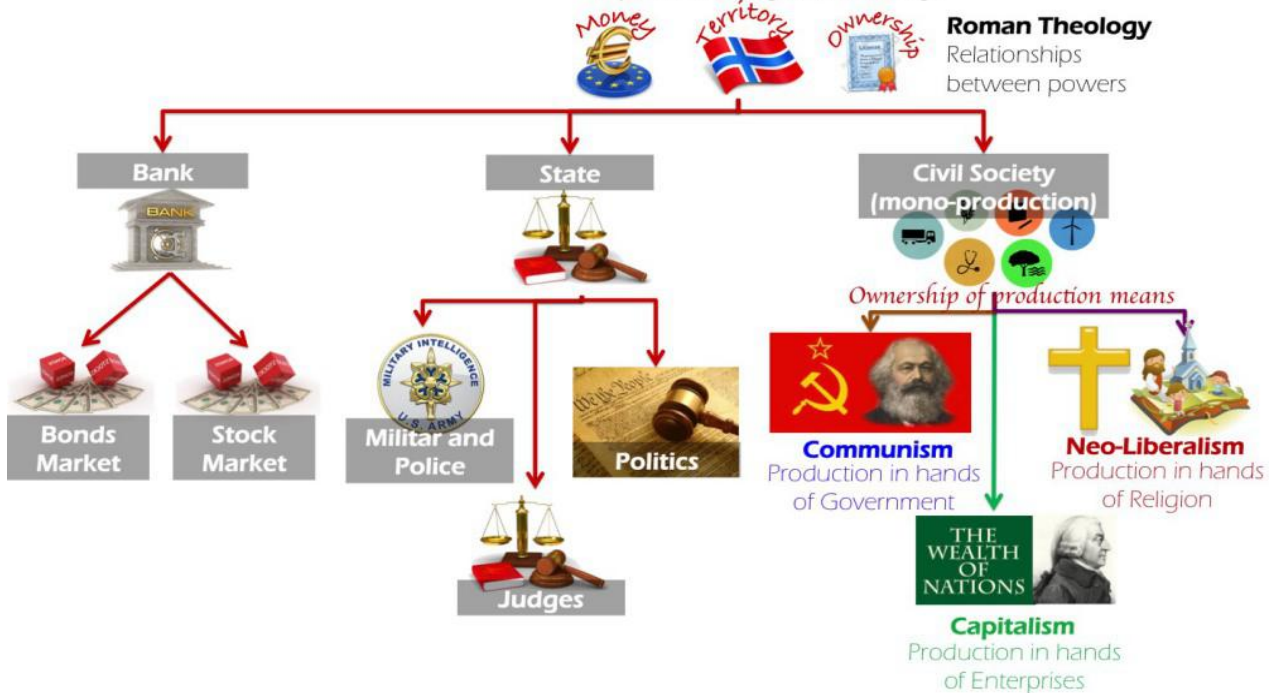

THEOLOGICAL TREE (MORAL SCIENCES)

VALORATIVE TREE: hierarchical network of valorative categories which determine the practical use of knowledge.

VALUATING TREE

Hierarchy of Categorical Models

'A priori' Theological knowledge

VALORATIVE CATEGORY: set of referential values and the network of archetypes which describes all their behavior, structured in three layers what is happening? How is happening? and execution archetypes.

Categorical Causal Model Architectural Style

Abstract Archetype: The Duties

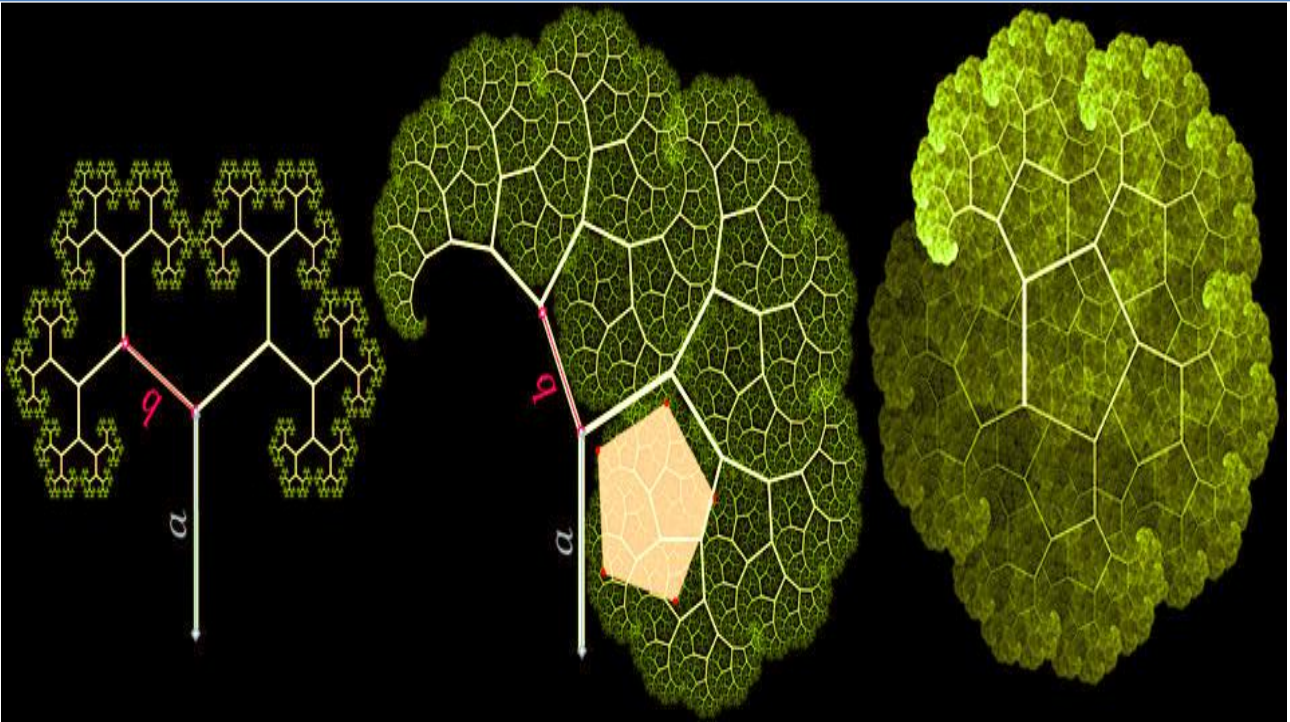

How to enhance, capitalize and use resources (human and natural)

1. **Duties towards God...** enhance resources (Saint Matt. VI)
2. **Duties towards one's self...** prosper (Saint Matt. V, 29,30)
3. **Duties towards each individual...** enhance humanity (Saint Matt. VII,12)
4. **Duties towards creatures...** enhance environment (Saint Matt. VI, 20,25)

	CATEGORY 1: Money 	CATEGORY 2: Territory 	CATEGORY 3: Property 
Categorical Archetype Constellation of Value (Theology)	Weapons  Stocks  Savings 		
What to do Roles Archetypes	BONDS  STOCK MARKET  FINANCE MARKET 		
How to do Actifacts Archetypes	Central Bank  Savings Bank 		
Technologies Implementation Archetypes	Actual Behaviours
